**Intracutaneous Oxygen Infusion Treatments - the must have facial for many celebrities.**

Intracutaneous Oxygen Infusions are a luxurious marriage of state-of-the-art oxygen technology and restorative relaxation. The Intracutaneous Topical Hyperbaric Oxygen System uses therapeutic grade oxygen under hyperbaric pressure to infuse a skin specific cocktail of hydrators, essential vitamins, botanicals, antioxidants and amino peptides to the deeper layers of the skin. The result is luminous, unparalleled hydration and visible, age defying results. Rehydrated, plumped up skin in less than an hour will set this treatment apart from any other facial treatment you have tried.

"I love the treatment! So does my face." Madonna

**Experience the new "WAVE" in whole body vibration**

• Incorporating Over 100 pre-set programs for exercise, massage and flexibility via touch screen technology

• Benefits include: accelerated weight loss, increased circulation, detoxification, muscle toning, increased strength, balance and flexibility... and the list goes on!

**Traditional Thai Massage**

Thai Massage has been taught and practiced in Thailand and for over 2500 years, makes it one of the oldest forms of massage in the world. It is one of four branches of traditional medicine in Thailand and is known as a blend of acupressure, energy meridian work and yoga like stretching.

Meghan, Divine Body's Traditional Thai Massage Therapist, was certified in Thai Massage from the Wat Po Traditional Medical School in Bangkok as well as the International Training Massage School in Chiang Mai. She was also fortunate to have the opportunity to train one on one with various Thai massage teachers throughout Thailand. Her background in physiotherapy, acupuncture and yoga are extremely complementary to Thai massage.

**Divine Body Spa also offers:**
